INTRODUCTION

This report summarizes the import interceptions submitted to the Centre of Expertise for Plant Quarantine Pests (CPQP, formerly Central Plant Health Laboratory) of the Animal and Plant Health Directorate of Agriculture and Agri-Food Canada during the three fiscal years from April 1, 1991 to March 31, 1994.

The report includes pests found to be associated with plants, plant products, baggage, cargo, mail, or other carriers entering Canada. The information is sorted in three ways: by PEST, by HOST and by ORIGIN and presented in three corresponding tables for each fiscal year. The PEST tables are divided into 3 sections: Entomology (includes arthropods and molluscs), Nematology, and Pathology (includes fungi and bacteria). The entries in ORIGIN tables have been sorted alphabetically by country. The entries for the United States are also sorted by state.

Most of the identifications were done by the staff of CPQP with support from the Research Branch of Agriculture and Agri-Food Canada and the Canadian Museum of Nature.

Further information may be obtained from:

Centre of Expertise for Plant Quarantine Pests

INTRODUCTION

Le rapport résume les interceptions de ravageurs dans des produits importés, ces derniers ayant été soumis au Centre d'expertise des phytoravageurs justiciable de quarantaine (CPJQ, auparavant connu sous le nom de Laboratoire central de la défense des végétaux) de Direction de l'hygiène vétérinaire et de la défense des végétaux de Agriculture et Agroalimentaire Canada au cours des trois exercices allant du 1er avril 1991 au 31 mars 1994.

Il comprend les ravageurs que l' on a trouvés associés à des végétaux, à des produits végétaux, à des bagages, à des marchandises, à du courrier ou à d'autres vecteurs entrant au Canada. L'information est triée de trois façons: par RAVAGEUR, par HÔTE et par PAYA D'ORIGINE et est presentée en trois tableaux correspondants pour chaque exercice. Les tableaux sur les RAVAGEURS sont divisés en trois sections : Entomologie (arthropodes et mollusques compris), Nématologie et Pathologie (champigons et bactéries compris). Les données figurant dans les tableaux sur les PAYS D'ORGINE ont été triées par ordre alphabétique de pays. Les entrées concernant les États-Unis sont aussi triées par État.

La plupart des ravageurs ont été identifiés par le personnel de CPJQ avec le concours de la Direction génerale de la recherche d'Agriculture et Agroalimentaire Canada et du Musée canadien de la nature.

SUMMARY OF PEST INTERCEPTIONS

This report includes pest interceptions from imported material that was submitted to CPQP during the fiscal years 1991-92, 1992-93 and 1993-94. The numbers of intercepted pests are listed in the table below.

NOMBRES DES RAVAGEURS INTERCEPTÉS

Le présent rapport fait état des ravageurs interceptés de matériaux à l'importation qui ont été examinés à CPJQ au cours des exercices financiers 1991-92, 1992-93 and 1993-94. Le nombre des ravageurs interceptés est donné au tableau qui suit.

Pests / Ravageurs	Number of Interceptions / nombre d'interceptions		
	1991-92	1992-93	1993-94
Arthropods and Molluscs / Arthropodes et mollusques	202	146	169
Nematodes / Nématodes	125	183	193
Fungi and Bacteria / Champignons et bactéries	59	56	64
Total	386	385	426

- Heterodera avenae N
- Pratylenchus sp. N
- Tylenchorhynchus sp. N

unknown rhizome /rhizome inconnu
- Criconemella sp. N
- Hoplolaimus sp. N

unknown tubers /tubercules inconnus
- Helicotylenchus sp. N
- Rhizoglyphus echinopus A

Vibernum carlesii
- Microtritia sp. A

Viburnum carlcyphalum
- Agrobacterium tumefaciens B

Viburnum carlesii
- Meloidogyne hapla N
- Pratylenchus sp. N

Viburnum sp.
- Pratylenchus sp. N

Vitis sp.
- Acarus poss. tyrophagoides A
- Agrobacterium tumefaciens B
- Atropacarus striculus A
- Helicotylenchus sp. N
- Oxychilus sp. M
- Paratylenchus sp. N
- Pratylenchus sp. N
- Rhysotritia ardua A
- Xiphinema sp. N

wood /bois
- Cerambycidae sp. A
- Coptotermes sp. A

wooden crates /cageots
- Cleridae sp. A
- Diacrisia sannio A
- Ernobius mollis A
- Monochamus alternatus A
- Sinoxylon anale A
- Sinoxylon conigerum A
- Sirex sp. A
- Xiphydria camelus A

wooden jewellery /bijoux de bois
- Coccotrypes sp. A

Yucca sp.
- Guignardia sp. F

Zea mays
- Helicoverpa zea A

Zelkova sp.
- Criconemella sp. N
- Erwinia carotovora B
- Erwinia chrysanthemi B
- Pseudomonas cichorii B
- Xanthomonas campestris B

Zingiber sp.
- Anisodera sp. A

Origin of Intercepted Pests / Origine des Ravageurs Interceptés 1993-94

A - Arthropod / Arthropode
B - Bacterium / Bactérie
F - Fungus / Champignon
M - Mollusc / Mollusque
N - Nematode / Nématode

1993-94
